Professional Summary

I am an experienced and dedicated LAMP-focused full stack web developer with additional deep expertise in networking, security, and general IT administration seeking a challenging full-time, part-time, or contract opportunity.

Work History

Full-Stack Web Developer, Systems Administrator, Data Analyst, Contractor

2005 - Present

- Legacy (non-framework) LAMP project implementation, optimization, maintenance, and support.
- Collaborate and guide projects through the SDLC.
- Legacy website conversions to modern responsive layouts using Bootstrap.
- Hosting migrations to AWS EC2 / S3 / SES.
- REST API integrations.
- Custom form, digital signature, and document rendering expertise.
- Detailed custom statement and reporting interfaces.

Transform Dealership Solutions, Co-Founder / Developer

2005 - 2013

- Custom CRM platform for automobile dealerships. Increased gross, decreased expense, and dramatically reduced paperwork processing time.
- Ground-up web-based SaaS product build.
- REST and SOAP-based API integrations with CUDL, RouteOne, TUNA (TransUnion), CBC (Credit Bureau Connection), and others.

SourceLink (Amsive), Lead Web Developer, Network and IT Administrator, Data Analyst

1997 - 2000, 2003 – 2005, Present

- 2005 – Present: contractor for same (see Full-Stack Web Developer above).
- Developed Direct mail portals for regional banks and finance companies that have generated well over \$15M+ in revenue over 15+ years.
- Provided comprehensive Network, Security, and IT Administration including SAS70 security compliance.
- Managed onsite fiber-connected data center and supported over 100+ employees.
- MS Server 2000/2003/2007, AD, RHEL-based Linux servers, various NAS, VPN WIFI, and other devices.
- Promoted from Entry-Level to Lead Programmer within 2 years.
